ChronoBeasts NFT Collection Set to Launch on Ethereum May 15

Time-themed generative art series introduces dynamic utility and cross-chain integrations

New York, NY — XYZ Labs, a Web3 creative studio focused on immersive blockchain experiences, is proud to announce the launch of its debut NFT collection: **ChronoBeasts**. The collection will be available for mint on **May 15, 2025**, exclusively on **OpenSea** via the Ethereum blockchain.

ChronoBeasts is a 5,000-piece generative art collection that explores the fusion of time, nature, and mythology through unique hand-drawn assets rendered with algorithmic variance. Each NFT functions not only as a digital collectible but also as an access key to future cross-chain gaming integrations and real-world merchandise drops.

"We wanted to go beyond the static nature of traditional NFTs," said Elena Varga, Creative Director at XYZ Labs. "ChronoBeasts evolve through time-based mechanics, creating a living, breathing experience for collectors."

Collection Highlights:

- **Supply:** 5,000 NFTs
- **Mint Price:** 0.08 ETH
- **Mint Date:** May 15, 2025
- **Blockchain:** Ethereum
- **Utility:** Dynamic traits, cross-chain gameplay, exclusive event access
- **Art Style:** Hand-drawn mythic creatures combined with time-themed generative layers

The ChronoBeasts roadmap includes staking mechanisms, seasonal trait evolutions, and integrations with the upcoming XYZ Metaverse Hub, slated for release later this year.

Community & Access

Collectors will be granted access to a token-gated Discord community, early whitelist opportunities for future drops, and limited-edition physical merchandise tied to specific NFT traits.
